

Dear colleague,

We here are all shocked at what has happened in Japan. The written and electronic media has been running the stories nonstop. The images of the disaster are quite overwhelming and there many public donation centres operating collecting monies for relief efforts.

The Japanese Ambassador is almost constantly on the air being interviewed and liaising with Canadian Govt officials about emergency material shipments to Japan.

You have our sincerest best wishes and hope that the suffering will be as limited as possible.

Alan Rock has contacted me to ask if SUMS is affected. He would like to contact President Bamba directly to see if and how we might help.

Our thoughts are with you

Sincerely

Tony
